Cancer Fund Drive Will Start April 1

A task force of more than 2,000 volunteers will launch the Ameri-can Cancer Society's annual Cru-sade April 1, seeking a fund rais-ing goal of \$125,000 in Palm Beach County.

April 1 start will be "C-Day" in more than a score of local communities with the county-wide campaign being directed by Harry Massey, West Palm Beach insur-

ance executive.

"During the campaign," Massey said, "Crusade volunteers of the Palm Beach County Unit of the American Cancer Society will be calling on friends and neighbors with a double-barrelled objective of saving lives now as well as in the future."

"Every resident" the chairman said, "can cooperate in this venture, by heeding the advice in the lifesaving education al literature which volunteers will distribute and by making generous contabu

tions."
"Our immediate objective," the chairman continued, "is to try and save half of the estimated 250,000 men and women who will get concert this year. The long range objective is to save the other 50 perfect but here for the perfect here are the content of cent but hope for them rests with scientists who are searching for breakthroughs that will cure all types of cancer or perhaps prevent

To meet the objectives means more money for public education to keep people informed on the di-seases and the kinds of preventative action that can be taken and

were money for cancer research.

Keynote of the Crusade, Massey said, is "to cure more—give more."

Funds raised during the Crusade are divided between local, state and national organizations for care of patients and further research.

year.
"Making poppies provides gain ful employment and needed work therapy for thousands of our ser-vicemen still hospitalized with war-time injuries. These tiny replias of the wild poppies which lined the battlefields of Europe during World War I have become the emblem for personal remembrance of our servicemen's sacrifices," Mrs. Rin go said.

This year more than twenty-five nillion (25,000,000) of the color ful paper flowers beve been made for the Auxiliary by hospitalized veterans of both World Wars and the Korean Conflict. Mrs. Ringo explained that making the poppies has provided beneficial employment for these veterans during the winter and spring months. All do-nations received will be gc directly to either veterans or members of their families.

William M. Harvey Seeks School Job

William M. Harvey, Lake Worth ttorney, has filed as a candidate for the Board of Public Instruction in District 3, subject to the Coun-

in District 5, subject to the County-Wide Democratic Primary on May 8, 1962.

In stating the reasons for his decision to seek the office, Harvey stated: "The Board of Public Instruction is the most important agency in Palm Beach County. It coverses under the levest budget. operates under the largest budget in the County, and needless to say, it spends the largest part of every tax dollar paid in by the property owners in Palm Beach County. The Board determines when and where schools are to be constructed and, to a large extent, the curriculm for our children. As a taxpayer, I am vitally interested in how our tax our children. As a taxpayer, I amvitally interested in how our tax
dollars are being spent. As the
father of two small sons, one of
whom will enter the first grade in
September, I am even more interested and concerned. A school
board member is entrusted by thepeople of Palm Beach County with
a grave responsibility, and only by a grave responsibility and only by a grave responsibility and only by full and faithful attention to his duties can a member keep abreast of one exploding school population and the problems connected therewith. I am qualified, by experience, for the position I seek and I pledge my untiring effort and ability to push Paim Beach County's school system to the lead in the education of our children."

TALLAHASSEE-The influx of visitors to Florida during 1961 broke the 12 million mark as the Sunshine State enjoyed the great-est year of its tourism history, Florida drew two million more visitors in 1961 than in 1960 for a total of 12,800,000.

Chairman-Director Wendell Jar-rard of the Florida Development Commission said a survey showed that 11,300,000 visitors came to Florida in 1959, but the dropped to 10,800,000 in 1950.

The figures represent only the persons vacationing in Florida and do not include business visitors. Largest group came by car with 10,000,000. Second largest came by plane, 1,400,000. Almost 500,00 va-300,000 by bus.

More than a million veterans who hold GI life insurance policies are using their regular annual divi-dends to guard against loss of their insurance, the Veterans Administration said today.

The VA recently announced that more than \$6,090,900 in dividends would be paid during 1962 to over 119,868 Florida veterans and ser-vicemen who hold participating GI insurance.

If they wish, GI policyholders may have these annual dividends held — with interest — by the agency as a credit to meet monthly premiums should the policyhold-ers fail to pay them before the end of the 31-day grace period. These dividends are subject to withdrawal by the policyholder on

request.

A policyholder who wishes to join those veterans who leave their dividends on deposit with VA for

this purpose should write to the VA insurance office which serves his policy, making sure to include his insurance number.

APPROX. ONE OF EVERY FOUR VISITORS IS SEEING FLORIDA FOR THE FIRST TIME!

It happened 100 YEARS ago

IN FLORIDA, a handful of determined patriots in Tar fought for 2 days, finally preventing an intended invasion by two Union ships, which fled. All Florida cheered this feat with glasses of beer.

For even then, beer was Florida's traditional beverage of moderation. Beer still provides enjoyment for Floridians, and a good living for many of them — not only the employees of the Brewing Industry tiest, but also for Florida farmers and other suppliers of the materials brewers use.

TODAY, in its centennial year, the United States Brewers Association still works constantly to as-sure maintenance of high standards of quality and propriety wherever beet and ale are served.

"Today we need a nation of Minute Men.... citizens who regard the preservation of freedom as a basic purpose of their daily life...."

-JOHN FITZGERALD KENNEDY

10 days after his inauguration as the 35th President of the United States.

Twenty years ago, in the dark, uneasy days before Pearl Harbor, the Minute Man of Concord, timeless symbol of our Nation's determination to defend its freedom, emerged as the emblem of the U. S. Savings Bonds Program. When war came, the Minute Man became the rallying force behind the huge and overwhelmingly successful effort to back our fighting men with War Bonds.

In this, the 20th anniversary year of Savings Bonds, the Minute Man of Concord calls all Americans to an unremitting effort to help preserve our peace and freedom, threatened by forces more powerful and resourceful than those we faced in 1941. Though this effort will take many forms, one way open to all is the continued investment in Shares in America, U. S. Savings Bonds, by "citizens who regard the preservation of freedom as a basic purpose of their daily life."

The power and permanence of the Word of God will be stressed at Christian Science services Sunday in a Lesson-Sermon on the subject of "Reality."

Among the Scriptural pass to be read is this verse from Psalm 107: "He sent his word, and healed them, and delivered them from their destructions."

From "Science and Health with Key to the Scriptures" by Mary Baker Eddy this citation will be read (p. 335): "Reality is spiritual,

harmonious, immutable, immortal, divine, eternal. Nothing unspirit-ual can be read, harmonious, or eternal.'

The Golden Text is from Isaiah (40): "The grass withereth, the flower fadeth: but the word of our God shall stnad for ever."

After reading a recent report on the rapid progress being made in several directions in the art of "saving time," I'm inclined to ask:

"Are you living faster now—and

According to the Economic Research Department of the Chamber

We farmers have been aware for some time that it is possible, by taking advantage of new research developments, to speed up growth of crops, weight gains in livestock and harvesting procedures. But not many of us are aware of the possible effects on ourselves as hu-mans that are implied in recent research and experiments with reference to our behavior patterns.

ence to our behavior patterns.

No doubt yeu've read that medical science has helped to increase considerably in this century the life expectancy of our population. Still, the person in his eighties is doing a good job of beating the average.

Now, not the following excerpt from the Chamber of Commerce report.

"Time and motion experts have estimated that a person born to-day, making full use of the avail-able time-saving techniques, can have a life expectancy of 230 years. (measured) in terms of what his ancestors have been able to accom-

The art of rapid reading has been taking the country by storm. It's need is based on data which shows that reading absorbs about 27 per cent of fthe average adult's time. Speed reading is offered as the answer. A Los Angeles student claims the world's record the story of the story o

How they could do it is beyond me, because no member of the team knew a word of Greek.

How far can we go in trying to change the normal functions of the human mind, the human brain and the human system? There are a thousand things many of us would like to have more time for - our families, friends, business, educa-tion, reading, the arts, recreation, travel. We feel the pressures on every side.

But let's face it. The press

that we feel are man-made. The tempo of our lives is what we make it. Some of the most successful I know are not adverse to going

It seems to me that our problem

is not how to live faster, but learning how to relax at the right time In Florida we're blessed with more In Florida we're blessed with more opportunities for pleasant relaxation than most other states enjoy. That's why I believe that rural life is the most satisfying and that those of us who can enjoy it are the favored ones. Our fountain of life is most anywhere, close to the land and Mother Nature.
